Java Developer

I graduated from Selcuk University - Computer Engineering at 08.2020. I started my master's degree in Computer Engineering at Konya Technical University in February 2022. I am aware that there is no limit to self-development. A person should improve himself day by day. I am very eager to improve myself.

Specialties: Java, Java Spring, Git, HTML5 ,CSS3, JavaScript, Thymeleaf

Technologies: Spring Boot, Hibernate, Lombok, ORM

Languages: English: B2

Programming resources used for self-learning: Free Code Camp, Stack Overflow, Open Source Java Packages on Github, React Docs

Interests: Electric guitar

PROFESSIONAL EXPERIENCE

Makine ve Kimya Endüstrisi Kurumu, Kırıkkale

June 2020 - August 2020

Intern Engineer

Took an active role both the web design and interface in the frontend, and the web projects connections with the server and database section in the backend; Converted design to code using technologies such as HTML, CSS, JavaScript, and Bootstrap. Spring Boot and Hibernate are used for backend.
